Speed

So `tup` is fast... Though it's still **SLOW**

Now with `latexmk` changes!

No better... Damn

Super fast with `pdflatex`...

Ten seconds per build, is really unacceptable.

Actually it's 9 seconds.

This is without ANY images. I shudder.

Don't be afraid of telling lies; be afraid of failing to communicate the truth

Slide with text and a note

Regular text size

Jonathan Sarna, *American Judaism* (New Haven: Yale University Press, 2014)

Slide with text and footnote

Surely this is true.¹

¹Jane Doe, *Says It Here* (New York: Oxford University Press, 2050).

This is a heading

Regular text on a slide:

- One
- Two
- Three

Code

Ruby example

```
puts "Hello world."  
def my_awesome_variable  
  puts "My awesome variable"  
end
```

Math

Yes of course there's math. $23/43 = (\frac{23}{43})$

$$\left(\frac{\xi}{\pi}\right) = \tau$$

Caveats

- No numbering for the moment.
- HTML Rendering is hit and miss.

Web Slides

- Not the prettiest
- **Great MathJax integration**
- Not ugly

- Fancy
- Pretty
- **Bad MathJax Rendering**

- Good looking
- Good MathJax support
- **Smaller than normal slides, stuff gets cut.**

- Not setup
- No styling

Multicolumn

- Test
- A column

Block one

Block 1

contents of block 1

Outside of block one, between.

Block 2

contents of block 2

- Not texpos
- Easier to work with

Photos

Sea Turtle

This is a sea turtle.

Citations

This shows how one might cite phony data. I cite Wombat and Koala (2016) and so I must be true.

Wombat, Walther, and Klaus Koala. 2016. "The True Meaning of 42." *Journal of Modern Skepticism*.
